Denise,

I just learned of your nomination, well deserved and congratulations!

I am really excited your innovative approach and leadership will get to span across the entire organization!

I would say the GSA is rapidly emerging as a government agency leader (and potentially the leader) in adopting Cloud Computing and realizing its benefits of agility, innovation, and cost-savings.

You have a very innovative and forward-looking team whom you'll be leading including, not the least to mention the Cloud Computing PMO, Office of Citizen Services and Innovative Technology (OCSIT), 18F, and Integrated Award Environment (IAE). All of whom have already shown some great work leveraging the Commercial Cloud. Obviously this all reflects well on the OCIO's office.

Please do not hesitate to reach out to me for any reason whatsoever. I love what GSA is doing with Cloud Computing and look forward to fostering it even further.

Thank you very much and congratulations again!

Hello Denise,

I just wanted to say that I really appreciated your GlobalWIN lunch discussion yesterday as well as our conversation on Cloud acquisition innovation afterwards.

I am very encouraged by GSA's recent actions, and particularly encouraged by the words and energy you provided in discussing where GSA was pushing the boundaries of current government practices. At some point after next week's Schedule 70 Cloud SIN Industry Day, I will look to reach out to you with some potential topics for discussion.

In the meantime I hope the holiday season is a good one for you.

Thank you very much,

(b) (6)
